

REMARKS/ARGUMENTS

Reconsideration of the application as amended is requested.

In the Office action of March 31, 2005, the Examiner stated that claim 4 was objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 4 (currently amended) has been rewritten in independent form to include all of the limitations of claim 1, as presented in the applicant's Election and Amendment filed January 29, 2005, which includes the same claim 1 to which the Examiner referred in the Office action of March 31, 2005, with one exception. That exception is: the limitation that the cart has front wheel support forks and its front wheel has been removed has been deleted. Instead, the cart is now recited as having a frame member. It is believed that the limitation regarding the cart's having front wheel support forks is unduly limiting and not necessary to the invention. It is further believed that claim 4 (currently amended) is patentably distinguishable over the cited prior art, requires only a cursory review on the part of the Examiner, and should be entered.

Applicant respectfully requests that a timely
Notice of Allowance be issued in this case.

No additional fee appears to be necessary.

Respectfully submitted,

Vivian L. Steadman
